

ReMOTE 25/37/61 & ZeRO SL

Premium 2/3/5-octave Soft Label USB MIDI Controller Keyboard
ZeRO version also available without keys

ANY PLUG-IN | ANY SEQUENCER | AUTOMATIC CONTROL

25-KEY

Huge LCD screens can display any set of control values on the SL

Assignable controls include velocity-sensitive trigger pads for sketching out beats

Finally, producing in the dark is a thing of the past. The SL shines a light on the murky world of MIDI control by providing two huge, brightly lit LCD screens that display up to 16 control names and values simultaneously. Alongside this is the intelligent Automap Universal™ technology, which detects the sequencer and plug-ins in use and intelligently maps parameters to the SL's pots, switches and sliders. With these award-winning features and a massive array of assignable controls, the SL takes the headache out of MIDI controlling, making music creation as spontaneous and exciting as it should be.

- **Huge Displays** - Two large, brightly backlit 144-character LCD screens provide instant views of control names/values, and easy menu navigation
- **Automap Universal™** - Revolutionary technology allows automatic mapping of software parameters to the SL's controls
- **Array of Assignable Controls** - A total of 64 assignable knobs, buttons and sliders, including 8 velocity-sensitive trigger pads, plus dedicated Transport controls
- **High Quality Keyboard** - Superb semi-weighted, high-quality keyboard with velocity- and aftertouch- sensitivity
- **2-D Controls** - Fantastic 'Xpression' pad and adjustably sprung pitch/mod joystick, both freely assignable in MIDI Controlling mode
- **Class Compliant** - Plug and Play USB connection with no drivers required for Windows XP or Mac OS X
- **Includes the Xcite + bundle** - A host of exciting software solutions, including Ableton Live Lite 6 and over 1.5 gigs of loops and samples

Revolutionary Automap Universal™ provides automatic intelligent control of any plug-in* and any sequencer, leaving you to focus on what matter most - your music.

Template Editor (PC/Mac):
Free application allowing even easier construction & modification of MIDI Templates

* Automap Universal allows plug-ins to automatically map straight to the SL, no matter what sequencer is in use. Every plug-in even has a Learn mode for instant re-arranging of parameter layout. Furthermore, open up certain applications (Reason, Cubase, Logic, Live, Pro Tools etc.) and the mixer and various other session parameters will be detected and mapped to logical areas of the SL, with their controls displayed clearly on the screens. (Only applies to Automatable plug-ins. Initially VST for PC and AU for Mac, with more to follow.) Visit www.novationmusic.com for more information.
